4. Key Insights & Business Recommendations

■ North is the #1 Revenue Region	North contributes 27.3% of total revenue (\$1.37M) and has the highest avg order value (\$5,130). Management should continue to invest in and protect North's position while understanding what's driving its success to replicate it elsewhere.
■ South Region is Underperforming	South is \$215K (16%) below North despite similar geography. Targeted sales campaigns, reassigning top rep David to support Southern accounts, or offering regional promotions could help close this gap in the next quarter.
■ Clothing Leads Revenue; Food Leads Profit Efficiency	Clothing tops categories at \$1.31M revenue. However, Food generates the most profit relative to its revenue base. Cross-selling food bundles to existing Clothing/Furniture buyers represents an untapped margin opportunity.
■ Mid-Year Dip Needs Attention (Jul-Sep)	A consistent 3-month dip in July, August, and September (lowest month: Sep at \$368K) represents a cyclical weakness. Pre-scheduling promotions, seasonal product bundles, or increased outreach during these months could smooth the revenue curve.
■ David & Bob Drive 47% of Revenue	Top-2 reps David (\$1.14M) and Bob (\$1.08M) generate 47% of total sales. Charlie's productivity is notably lower at \$861K. A mentorship program or territory review for Charlie could unlock significant growth without new headcount.
■ January is the Strongest Month	January 2023 (\$476K, 100 orders) was the best month. Management should analyze what drove this — whether it was post-holiday stock clearing, promotions, or new-year purchasing cycles — and replicate those conditions.
